

UNDER COUNTER

POINT OF USE WATER FILTRATION SYSTEMS

The P.O.U. Water Filter System eliminates unwanted substances from source water. Designed as a point of use water filter system, the 5 micron sediment filter removes sediment, silt and rust. The G.A.C. (Granular Activated Carbon) and or Carbon Block filters remove up to 99% of Chloramines, Chlorine, TCE, Benzene, pesticides, and other Volatile Organic Contaminants (V.O.C.'s) from drinking water.

** Specialty filtration systems available for the reduction of : pH, Fluoride, Arsenic, Nitrate and Radium.

TWIN UNDER COUNTER TASTE & ODOR

2 Stage Water Filter System
With dual, replaceable cartridge filters.

TRIPLE UNDER COUNTER TASTE & ODOR

3 Stage Water filter System
With multiple, replaceable, cartridge filters.

STANDARD FILTRATION

Stage 1- Sediment Cartridge removes sand, silt and rust.

Stage 2- Granular Activated Carbon Cartridge removes Volatile Organic Chemical Contaminants.

Stage 3- Carbon Block Cartridge further removes V.O.C.'s and fibers to .5 micron

*Reduction of cryptosporidium & Giardia cysts.

(Twin Filter system second stage)

Providing service after the sale since 1967.

POINT OF USE WATER FILTER SYSTEMS

- ◇ **UNIVERSAL FILTERS**
Replacement filters are readily available from us and other sources .
